## Profiles

 abisheik-r

 abishek277

## Career Objective

I desire to employ my skills in software development to contribute efficiently in dynamic team contexts while consistently providing high-quality solutions. Proficient in articulating ideas clearly and fostering effective collaboration, I am also passionate about continuous learning and professional development.

## Interests

### Software Development

### Skills

C, Python(intermediate), HTML, CSS, SQL(basics)

## Education

<b>Karpagam college of Engineering coimbatore</b>	<b>2021 - 2025</b>
BE Computer Science Engineering	
7.57 CGPA	
<b>Kamaraj MHSS - Kovilpatti</b>	<b>2020 - 2021</b>
82%	HSC
<b>Edustar International School - Kovilpatti</b>	<b>2018 - 2019</b>
73%	SSLC

## Projects

### DDoS preventer

This project is a Flask web application built using python and front-end languages that demonstrates DDoS attack mitigation by blacklisting IPs based on request rates and includes features for user authentication, product management, and AES-encrypted passwords. It also provides an interface to initiate and stop simulated DDoS attacks and allows users to check if their IP is blocked.

### Daily Expense Management System Using Python

It is a Python application that helps users track their daily expenses through a simple web interface. Users can log expenses made via Cash, Card, or UPI, and view the total amount spent. The interface is built using HTML and CSS, while Python handles the backend processing and data storage.

## Internships

<b>Gateway software solutions</b>	<b>July 2023 - August 2023</b>
Intern	
During the internship, I worked on mobile and web application development concepts, gaining hands-on experience with user interface design, frameworks and essential algorithms .	

## Certifications

### Programming in C, programming in Python

Udemy
